Backend developer

I am Megdad Imed, a student at ESI ALG and a backend web developer with **2 years** of experience. My experience spans multiple academic and personnel projects.

My skills set includes expertise in **Laravel** , **Django** and **fastapi** for backend development, as well as **HTML**, **CSS**, **SCSS**, **JavaScript**, and **React** for frontend development. I have used **SQL databases** for all my projects. I have been working on my **problem-solving** skills for 3 years and have built a general understanding of software **architecture patterns**.

In my years of studying computer science, I have learned many programming concepts like **OOP**, **data structures**, etc..

EDUCATION

2 CS in Information systems

Ecole nationale Superieure d'Informatique (ESI)   Algers • 09/2021 - 09/2024

CERTIFICATIONS

Completed HR-BOT Back-end task   08/2024 - 10/2024

ThynkTech

PROJECTS

AutoReview-Hr   08/2024 - 10/2024

ThynkTheck

The project is a website that helps jobseekers test their CVs and apply for jobs through an interactive chatbot. The Hrs can create job posts, and then they will receive the job applications which they can accept or reject. I worked as a Backend Developer with a team of 8 developers, using FastAPI, MariaDB.

Scientific Articles Search Engine   11/2023 - 01/2024

The purpose of this project is to create a website that extracts the content from the article (PDF) and provides a search engine that searches for articles. I built the backend of the website with the team using Django and Postgres.

Tahsin   11/2023 - 12/2023

Tahsin startup

Tahsin is a website for presenting the "Tahsin Plus" project, designed to enhance medical students' learning experience.

Hikaya   07/2023 - 09/2023

It is a website for people who like to write and publish their stories. I worked on it on my own as a full-stack Developer using Laravel, MySQL, HTML, CSS, JavaScript.

Ikhtiyar   02/2023 - 06/2023

This is the first school project. It is a website to compare offers from various banks, helping users make informed financial decisions. I worked in a team of 6 developers, and we were able to reach

most of the banks' offers, develop the website, and present it to the jury.
