Summary

Computer Science Engineer, graduate of the **Higher School of Computer Science (ESI)**, passionate about web development. Experienced in developing **full-stack** applications, covering both backend and frontend development, designing relational databases, and integrating secure authentication systems. Actively seeking opportunities to grow my skills in a professional environment.

Experience

- Jul 2024 – Sep 2024 **Backend Developer - Intern, ThynkTech, Algiers**
- Built backend of Auto-View, a job management web application.
 - Optimized RESTful APIs for speed and scalability.
 - Integrated JWT and OAuth2 authentication for secure access.
- Oct 2025 – June 2026 **AI Engineer - Intern, Ourquilane, Algiers**
- Developed dashboards with key KPI indicators for operational monitoring.
 - Built a multi-warehouse prediction and optimization system, forecasting future orders from historical data.
 - Tested and compared multiple optimization methods to align warehouse stock levels across locations.
- 2025 – Present **Freelance Web Developer, Self-employed, Remote**
- Designed and deployed full-stack applications tailored to client needs.
 - Delivered end-to-end solutions using Nextjs, Nestjs, and Django.

Projects

- 2025 **E-commerce Marketplace (Vestrend)**
- Contributed to Vestrend, a multi-vendor e-commerce marketplace connecting local Algerian merchants with buyers.
 - Developed both frontend and backend, covering vendor onboarding, product listings, and order management.
 - Implemented a recommendation system to suggest relevant products to buyers.
- 2025 **Reporting System (Sonatrach)**
- Built a real-time automated KPI tracking web system for drilling operations.
 - Extracted and structured data from field reports, reducing manual reporting by 70%.
 - Designed interactive dashboards for project managers.
- 2024 **Food Ordering App (MaklaEpress)**
- Developed a full-stack food ordering mobile application for restaurants.
 - Built backend with Django & PostgreSQL, Kotlin.
 - Implemented secure authentication, order management, and payment workflows.
- 2023 **Bank Comparison Website (Ikhtiar)**
- Built a comparison website for loan and banking offers in Algeria.
 - Designed backend API for financial data aggregation.
 - Helped users select optimized loan options through a clear UI.

Skills

Languages	JavaScript, Python, SQL, Java
Frontend	Nextjs, HTML, CSS, Tailwind, JavaScript
Backend	FastAPI, Nestjs, Django, Flask, REST APIs, JWT, OAuth2, redis, Celery
Databases	PostgreSQL, MySQL, MongoDB, MariaDB
DevOps	Git, GitHub, GitHub Actions, Docker, CI/CD, Nginx, Linux
Other	Web Scraping (BeautifulSoup, Selenium), Debugging

Languages

Languages Arabic (Native), French (Intermediate), English (Intermediate)

Education

2021 – 2026 **Engineering Degree in Computer Science, École Supérieure de l'Informatique, Algiers**
