

Summary

Computer Science Engineer, graduate of the **Higher School of Computer Science (ESI)**, passionate about web development. Experienced in developing **full-stack** applications, covering both backend and frontend development, designing relational databases, and integrating secure authentication systems. Actively seeking opportunities to grow my skills in a professional environment.

Skills

Programming Languages	JavaScript, TypeScript, Python, SQL, Java
Frameworks	Next.js, React, NestJS, Django, Flask, FastAPI
Databases	PostgreSQL, MySQL, MongoDB, MariaDB
DevOps	Git, GitHub, GitHub Actions, Docker, CI/CD, Nginx, Linux, Vercel, Coolify
Tools	Redis, Celery, TypeORM, Zustand, Alembic, SQLAlchemy, Socket.IO, Tailwind, Web Scraping (BeautifulSoup, Selenium)
Authentication	JWT, OAuth2

Experience

Jul 2024 – Sep 2024	Backend Developer - Intern, ThynkTech, Algiers - Built backend of Auto-View, a job management web application. - Optimized RESTful APIs for speed and scalability. - Integrated JWT and OAuth2 authentication for secure access.
Oct 2025 – June 2026	AI Engineer - Intern, Ourquilane, Algiers - Built a multi-warehouse demand forecasting and stock optimization system, predicting future orders from historical data. - Benchmarked and compared multiple optimization algorithms to align stock levels across warehouses. - Developed dashboards with key KPI indicators to support operational decision-making.
2025 – Present	Freelance Web Developer, Self-employed, Remote - Designed and deployed full-stack applications tailored to client needs. - Delivered end-to-end solutions using Next.js, NestJS, and Django.

Work Projects

E-commerce Marketplace (Vestrend)	Link
- Contributed to Vestrend, a multi-vendor e-commerce marketplace connecting local Algerian merchants with buyers. - Developed both the frontend and backend, covering vendor onboarding, product listings, and order management. - Designed scalable REST APIs supporting vendors, customers, orders, payments, and personalized product recommendations.	
Reporting System (Sonatrach)	
- Built a real-time automated KPI tracking web system for drilling operations. - Extracted and structured data from field reports, reducing manual reporting by 70%. - Designed interactive dashboards for project managers.	
Agricultural Marketplace (Agrinet)	Link
- Developed a full-stack agricultural marketplace platform, similar to Ouedkniss but for farming products and vendors. - Built the advertising system as the platform's main admin feature for managing advertisements. - Added product listing and vendor contact features.	
Farm Management Desktop App	
- Built a desktop application for managing livestock, tracking each cow's individual data such as date of birth, weight, and health/illness records. - Implemented an automated notification system to alert the seller when a cow's expected birth date is approaching.
